They say you shouldn't ask your mom whether your business is a good idea, because she loves you and will lie to you. This is technically true, but it misses the point. As a matter of fact, it's not their responsibility to tell you the truth. It's your responsibility to find it and it's worth doing right . Talking to customers is one of the foundational skills of both Customer Development and Lean Startup. We all know we're supposed to do it, but nobody seems willing to admit that it's easy to screw up and hard to do right. This book is going to show you how customer conversations go wrong and how you can do better.

Ethics and Sport in Europe Dominique Bodin, Gaele Sempé, 2011-01-01 Defending ethics in sport is vital in order to combat the problems of corruption, violence, drugs, extremism and other forms of discrimination it is currently facing. Sport reflects nothing more and nothing less than the societies in which it takes place. However, if sport is to continue to bring benefits for individuals and societies, it cannot afford to neglect its ethical values or ignore these scourges. The major role of the Council of Europe and the Enlarged Partial Agreement on Sport (EPAS) in addressing the new challenges to sports ethics was confirmed by the 11th Council of Europe Conference of Ministers responsible for Sport, held in Athens on 11 and 12 December 2008. A political impetus was given on 16 June 2010 by the Committee of Ministers, with the adoption of an updated version of the Code of Sports Ethics (Recommendation CM/Rec(2010)9), emphasising the requisite co-ordination between governments and sports organisations. The EPAS prepared the ministerial conference and stepped up its work in an international conference organised with the University of Rennes, which was attended by political leaders, athletes, researchers and officials from the voluntary sector. The key experiences described in the conference and the thoughts that it prompted are described in this publication. All the writers share the concern that the end result should be practical action - particularly in terms of the setting of standards - that falls within the remit of the EPAS and promotes the Council of Europe's core values.

Our Kids Robert D. Putnam, 2016-03-29 The bestselling author of *Bowling Alone* offers [an] ... examination of the American Dream in crisis--how and why opportunities for upward mobility are diminishing, jeopardizing the prospects of an ever larger segment of Americans--

Capital as Power Jonathan Nitzan, Shimshon Bichler, 2009-06-02 Conventional theories of capitalism are mired in a deep crisis: after centuries of debate, they are still unable to tell us what capital is. Liberals and Marxists both think of capital as

an 'economic' entity that they count in universal units of 'utils' or 'abstract labour', respectively. But these units are totally fictitious. Nobody has ever been able to observe or measure them, and for a good reason: they don't exist. Since liberalism and Marxism depend on these non-existing units, their theories hang in suspension. They cannot explain the process that matters most - the accumulation of capital. This book offers a radical alternative. According to the authors, capital is not a narrow economic entity, but a symbolic quantification of power. It has little to do with utility or abstract labour, and it extends far beyond machines and production lines. Capital, the authors claim, represents the organized power of dominant capital groups to reshape - or creorder - their society. Written in simple language, accessible to lay readers and experts alike, the book develops a novel political economy. It takes the reader through the history, assumptions and limitations of mainstream economics and its associated theories of politics. It examines the evolution of Marxist thinking on accumulation and the state. And it articulates an innovative theory of 'capital as power' and a new history of the 'capitalist mode of power'.
