**The Future of Health-care Delivery** Stephen C. Schimpff, 2012 Approximately 100,000 deaths per year in the United States result from preventable medical errors. This figure is about twice the number of people who die in car accidents and five times the number of murder victims annually, and twenty times the number of servicemen and women killed in Iraq and Afghanistan since the start of hostilities in 2001. If you think Americans have the best health-care system in the world, think again. In this deeply researched and controversial book, Dr. Stephen Schimpff explains why our health-care delivery system serves us so poorly, why it costs so much, and why government policy over many decades has not only failed to improve care

delivery but has actually made it worse. In the process, he dispels common misconceptions about medicine and health care. *The Future of Health-Care Delivery* provides timely information and a road map to achieve world-class care delivery, putting health care where it belongs--in the hands of the patient and medical professionals instead of the insurance companies and government.

*Affordable Excellence* William A. Haseltine, 2013 Today Singapore ranks sixth in the world in healthcare outcomes well ahead of many developed countries, including the United States. The results are all the more significant as Singapore spends less on healthcare than any other high-income country, both as measured by fraction of the Gross Domestic Product spent on health and by costs per person. Singapore achieves these results at less than one-fourth the cost of healthcare in the United States and about half that of Western European countries. Government leaders, presidents and prime ministers, finance ministers and ministers of health, policymakers in congress and parliament, public health officials responsible for healthcare systems planning, finance and operations, as well as those working on healthcare issues in universities and think-tanks should know how this system works to achieve affordable excellence.--Publisher's website.

Introduction to the Financial Management of Healthcare Organizations Michael Nowicki,2017-07

*Development Finance Institutions* Mark Schreiner,Jacob Yaron,2001-01-01 The purpose of the measurement of the social cost of subsidised development finance institutions (DFIs) is to see if the social benefit exceeds the social cost. In most cases, it is so expensive to measure social benefits that a full-blown social cost-benefit analysis cannot be done. The measurement of social costs, however, is not as expensive, and it can inform choices of how to spend public funds. This paper presents two measures of social cost. The first is the Subsidy Dependence Index (SDI) that can measure social cost in short time frames. The second measure is the net present cost of society (NPCS), which can measure social cost in any time frame. Both the SDI and the NPCS model shift the emphasis from prices paid to opportunity costs.
