Historia de la forma urbana Anthony Edwin James Morris, 1992

History of Urban Form Before the Industrial Revolution A.E.J. Morris, 2013-12-02 Provides an international history of urban development, from its origins to the industrial revolution. This well established book maintains the high standard of information found in the previous two editions, describing the physical results of some 5000 years of urban activity. It explains and develops the concept of 'unplanned' cities that grow organically, in contrast with 'planned' cities that were shaped in response to urban form determinants. Spread throughout the texts are copious illustrations from a wealth of sources, including cartographic urban records, aerial and other photographs, original drawings and the author's numerous analytical line drawings.

Pure Space (Spanish Edition) Elisa Silva, 2020-11-24 This book may seem a simple accumulation of twenty-one public space projects in eight Latin American cities. On closer inspection, the presentation of project descriptions, photographs, and annotated drawings reflects a concern to analytically explain the operative aspects at work. The publication is not intended to

serve only as a catalogue, guide, or manual on how to produce public space in spontaneous settlements. Rather, it goes beyond the aims of an index of best practices. It is intended, instead, as an empirical base for a critical and theoretical engagement with the problematic of development, social inclusion, public investment, (in)formal settlement, civil society and the public sphere. The publication achieves its final function at this third level, by providing a compelling argument to expand the agency of architects and urban designers and creatively find ways of justifying, financing, and building public spaces in communities —spaces that have a catalytic effectiveness in achieving significant urban and social transformation. This book was awarded by a Graham Foundation Grant and CAF Development Bank of Latin America. **FEATURED CASE STUDIES:**

Gated Communities Samer Bagaeen, Ola Uduku, 2010-02-09 Gated Communities provides a historic, socio-political and contemporary cultural perspective of gated communities. In doing so it offers a different lens through which to view the historical vernacular background of this now global phenomenon. The book presents a collection of new writing on the issue by an international and interdisciplinary group of contributors. The authors review current thinking on gated communities and consider the sustainability issues that these contemporary 'lifestyle' communities raise. The authors argue that there are links that can be drawn between the historic gated homesteads and cities, found in much of the world, and today's Western-style secure complexes. Global examples of gated communities, and their historical context, are presented throughout the book. The authors also comment on how sustainability issues have impacted on these communities. The book concludes by considering how the historic measures up with the contemporary in terms of sustainability function, and aesthetic.

Islamic Heritage Architecture C.A. Brebbia, A. Martinez Boquera, 2016-12-28 This book contains papers presented at the

1st International Conference on Islamic Heritage Architecture and Art. The papers deal with the design of many types of buildings in Islamic countries and the influence that these structural forms have had in non-Islamic countries. Coverage will also include construction materials. There is much to learn from past experiences to arrive at solutions that are environmentally sound and sustainable in the long term. As conventional energy resources become scarce, the Islamic design heritage can offer invaluable lessons on how to deal with difficult and extreme environments in an efficient manner. Traditional architecture and urban environment in most Islamic countries is now being eroded by overemphasis on global type of architecture and city planning. Consequently, many regions are losing their identity. The Conference will aim to review these developments in the light of what the classical Islamic urban designs and architectures have to offer modern society. There will also be coverage of conservation techniques appropriate to the materials and structural forms used. The papers in this book cover such topics as: Architectural conservation; Architectural heritage; Architecture in Malaysia and Indonesia; Climate adaptability; Conservation and restoration; Historical aspects; Houses and gardens; Islamic art and globalisation; Mosques and minarets; Ottoman Istanbul; Schools; The African Coast; The Islamic urban environment; The Mediterranean region; The use of light; Vernacular architecture; Wood and wooden roofs. The contents will be of interest to all researchers, practitioners and government employees actively involved with Islamic Heritage Architecture.

Cerdá Idefonso Cerdá, 1999 Spanish civil engineer, Idefonso Cerda, invented the term 'urbanization' in 1860-61. His theory was the first in modern times to focus methodically on the city as a construction, its evolution and the workings and interaction of its constituent parts. This book is split into 5 sections: The Technical, Administrative, Legal, Economic and Political Bases of Urbanization. It is the first time Cerda's work has been published in English.

The Fortress of Salvador in Colonial Brazil Filho, Luiz Walter Coelho, 2015-12-29 In this book, Luiz Walter Coelho Filho contextualizes the planned city of Salvador by situating it in time and space, and analyzes its design, urban plan, and purpose, presenting it as an integral part of the social, political, and economic state of affairs at the time. His research utilizes documents and analyzes facts, interprets texts and urban lay-out, and draws on history, science, rationalism, and fiction. The Fortress of Salvador in Colonial Brazil is the fruit of research and passion, knowledge and adventure, dedication and perseverance. Translated by Catherine V. Howard.

Removing Barriers to Environmental Comfort in the Global South Laura Marín-Restrepo, Alexis Pérez-Fargallo, María Beatriz Piderit-Moreno, Maureen Trebilcock-Kelly, Paulina Wegertseder-Martínez, 2023-05-11 This book describes how comfort, energy and climate change in developing countries and vulnerable sectors of the population relate to buildings. The building sector is currently facing significant challenges connected to energy consumption, energy poverty and climate change effects. When studied in developing countries and vulnerable sectors of the population, these factors, which are

commonplace in the tropics and the southern hemisphere, are interlinked and share a critical component: environmental comfort. Although progress has been made in environmental comfort through research and the development of standards and policies at the international level, in the Global South, where the countries with the highest levels of income inequality are concentrated, environmental comfort has its own characteristics and challenges that prevent a clear understanding from the established vision of the Global North. This book presents research, theories and techniques related to Thermal comfort, Indoor air quality, Visual comfort, and Acoustic comfort and its relationship with energy use and energy efficiency, seeking to address different barriers to environmental comfort. It shows how to improve the way buildings are designed and operated to promote healthier environmental conditions and more sustainable construction, by presenting studies and reflections carried out in the target geographical area: the Global South. In this way, this book contributes to developing the concept of environmental comfort, visualising how progress has been made in understanding it from a tropical and southern perspective, and posing common challenges. The book is intended for engineers, architects, and researchers of the built environment who are interested in environmental comfort and its influence on energy consumption, energy poverty, and other related factors in the Global South context. It is also a useful resource for decision-makers and public policy developers concerned with the indoor comfort of buildings. Moreover, the book aims to provide guidance for those in developing countries by gathering existing knowledge in the field for the tropics and southern hemisphere climatic and sociocultural contexts, allowing us to move forward in this subject with actions and proposed solutions that fit our particular needs.

Breve historia de la lengua española David A. Pharies, 2010-02-16 El español es la cuarta lengua más hablada en el mundo y el idioma de una cada vez mayor importancia en los Estados Unidos de América. En lo que esperábamos resultara la introducción a la historia de la lengua española, David Pharies, clara y conscientemente, trazó la evolución del español desde sus raíces indo-europeas hasta su estado actual. Un reconocido experto internacional en la historia y el desarrollo de esta lengua, Pharies presenta sobre este tema un sentido preciso de lo que los estudiantes de español necesitan saber. Después de los capítulos introductorios de lo que significa el estudio de la historia de una lengua, el concepto del cambio lingüístico y de la naturaleza de las familias lingüísticas, Pharies hace un seguimiento al desarrollo del español desde sus raíces latinas, todo ello con una mínima cantidad de lenguaje técnico posible. En las secciones centrales del libro, los lectores son llevados por una presentación sucinta, comprometedor y admirable, de la genealogía y desarrollo de la lengua incluyendo explicaciones de las estructuras y peculiaridades del latín, los eventos históricos y culturales que influenciaron profundamente la forma del lenguaje, la naturaleza del español medieval, los mitos lingüísticos formando parte del español y el desarrollo de la lengua más allá de la península ibérica, en particular, en el continente americano. Centrándose en las más importantes facetas de la evolución de la lengua, esta obra concisa hace que la historia del español sea accesible a todos, con una comprensión del mismo y una disposición para entender los conceptos básicos del lenguaje. Disponible en ambas

ediciones, inglés y español, *Una Breve Historia de la Lengua Española*, nos brinda una extraordinaria introducción a la fascinante historia de una de las más importantes lenguas del mundo. Spanish is the fourth most widely spoken language in the world and a language of ever-increasing importance in the United States. In what will likely become the introduction to the history of the Spanish language, David Pharies clearly and concisely charts the evolution of Spanish from its Indo-European roots to its present form. An internationally recognized expert on the history and development of this language, Pharies brings to his subject a precise sense of what students of Spanish linguistics need to know. After introductory chapters on what it means to study the history of a language, the concept of linguistic change, and the nature of language families, Pharies traces the development of Spanish from its Latin roots, all with the minimum amount of technical language possible. In the core sections of the book, readers are treated to an engaging and remarkably succinct presentation of the genealogy and development of the language, including accounts of the structures and peculiarities of Latin, the historical and cultural events that deeply influenced the shaping of the language, the nature of Medieval Spanish, the language myths that have become attached to Spanish, and the development of the language beyond the Iberian Peninsula, especially in the Americas. Focusing on the most important facets of the language's evolution, this compact work makes the history of Spanish accessible to anyone with a knowledge of Spanish and a readiness to grasp basic linguistic concepts. Available in both English and Spanish editions, *A Brief History of the Spanish Language* provides a truly outstanding introduction to the exciting story of one of the world's great languages.

Building Yanhuitlan Alessia Frassani, 2017-10-12 Through years of fieldwork in the state of Oaxaca, Mexico, art historian and archaeologist Alessia Frassani formulated a compelling question: How did Mesoamerican society maintain its distinctive cultural heritage despite colonization by the Spanish? In *Building Yanhuitlan*, she focuses on an imposing structure—a sixteenth-century Dominican monastery complex in the village of Yanhuitlan. For centuries, the buildings have served a central role in the village landscape and the lives of its people. Ostensibly, there is nothing indigenous about the complex or the artwork inside. So how does such a place fit within the Mixteca, where Frassani acknowledges a continuity of indigenous culture in the towns, plazas, markets, churches, and rural surroundings? To understand the monastery complex—and Mesoamerican cultural heritage in the wake of conquest—Frassani calls for a shifting definition of indigenous identity, one that acknowledges the ways indigenous peoples actively took part in the development of post-conquest Mesoamerican culture. Frassani relates the history of Yanhuitlan by examining the rich store of art and architecture in the town's church and convent, bolstering her account with more than 100 color and black-and-white illustrations. She presents the first two centuries of the church complex's construction works, maintenance, and decorations as the product of cultural, political, and economic negotiation between Mixtec caciques, Spanish encomenderos, and Dominican friars. The author then ties the village's present-day religious celebrations to the colonial past, and traces the cult of specific images through these

celebrations' history. Cultural artifacts, Frassani demonstrates, do not need pre-Hispanic origins to be considered genuinely Mesoamerican—the processes attached to their appropriation are more meaningful than their having any pre-Hispanic past. Based on original and unpublished documents and punctuated with stunning photography, *Building Yanhuitlan* combines archival and ethnographic work with visual analysis to make an innovative statement regarding artistic forms and to tell the story of a remarkable community.

The Romanization of Central Spain Leonard A. Curchin, 2004-05-05 Curchin explores how, why and to what extent the peoples of Central Spain were integrated into the Roman Empire during the period from the second century BC to the second century AD. He approaches the question from a variety of angles, including the social, economic, religious and material experiences of the inhabitants as they adjusted to change, the mechanisms by which they adopted new structures and values, and the power relations between Rome and the provincials. The book also considers the peculiar cultural features of Central Spain, which made its Romanization so distinctive.

Enemies in the Plaza Thomas Devaney, 2015-04-03 Toward the end of the fifteenth century, Spanish Christians near the border of Castile and Muslim-ruled Granada held complex views about religious tolerance. People living in frontier cities bore much of the cost of war against Granada and faced the greatest risk of retaliation, but had to reconcile an ideology of holy war with the genuine admiration many felt for individual members of other religious groups. After a century of near-continuous truces, a series of political transformations in Castile—including those brought about by the civil wars of Enrique

IV's reign, the final war with Granada, and Fernando and Isabel's efforts to reestablish royal authority—incited a broad reaction against religious minorities. As Thomas Devaney shows, this active hostility was triggered by public spectacles that emphasized the foreignness of Muslims, Jews, and recent converts to Christianity. *Enemies in the Plaza* traces the changing attitudes toward religious minorities as manifested in public spectacles ranging from knightly tournaments, to religious processions, to popular festivals. Drawing on contemporary chronicles and municipal records as well as literary and architectural evidence, Devaney explores how public pageantry originally served to dissipate the anxieties fostered by the give-and-take of frontier culture and how this tradition of pageantry ultimately contributed to the rejection of these compromises. Through vivid depictions of frontier personalities, cities, and performances, *Enemies in the Plaza* provides an account of how public spectacle served to negotiate and articulate the boundaries between communities as well as to help Castilian nobles transform the frontier's religious ambivalence into holy war.

Land Squandering and Social Crisis in the Spanish City Jesús Manuel González Pérez, Francisco Cebrián-Abellán, María José Piñeira-Mantiñán, 2019-06-20 The last two decades have been marked by intense and accelerated economic, political, and cultural processes that have affected urban spaces. These changes have occurred in different parts of cities (traditional centers, edges, peripheries) and at different levels of the urban system (large and medium-sized cities and in their respective areas of influence). Possibly the clearest expression of the spatial effects on cities can be perceived in their morphological transformations, their territorial dimensions, or in their social problems. Until 2008, urban-territorial processes were a reflection of the logic and inconsistencies of an expansive economic context and of a structural context that favored the development of cities through concurrent processes and actors. As a result, the built land and amount of urbanized and built surfaces increased, together with processes of the expansion and modernization of cities. Since 2008, the expansive economic cycle has ended, and there have been diverse negative consequences. Notably, the construction sector has come to an abrupt halt. Access to credit has also been reduced, and unemployment has increased. The economic recession has caused sociodemographic and socioeconomic issues exemplified by housing vulnerability, with dispossession, evictions, a shortage of social housing, and energy poverty.
