OECD

OECD Environmental Performance Reviews: Greece 2009 OECD,2010-03-15 OECD's comprehensive review of Greece's environmental programs and policies, covering air and water management, nature and biodiversity, sustainable development, the environment-economy interface, the environment-social interface, and international commitments.

OECD Environmental Performance Reviews OECD Environmental Performance Reviews: Greece 2009 OECD,2010-03-15 OECD's comprehensive review of Greece's environmental programs and policies, covering air and water management, nature and biodiversity, sustainable development, the environment-economy interface, the environment-social interface, and international commitments.

OECD Environmental Performance Reviews: Greece 2009 (Greek version) OECD,2010-06-29

OECD Environmental Performance Reviews: Greece 2020 OECD,2020-10-05 Greece has undergone extensive reforms to cope with a deep recession over the past decade. It has made progress in decoupling air pollutant emissions from GDP and improving the conservation status of natural habitats. However, the country faces challenges in managing waste and water, and addressing air pollution.

Compromise Planning : A Theoretical Approach from a Distant Corner of Europe Louis C. Wassenhoven,2022-03-28 The purpose of the book is to elaborate a planning theory which departs from the plethora of theories which reflect the conditions of developed countries of the North-West. The empirical material of this effort is derived from a country, Greece, which sits on the edge between North-West and South-East, at the corner of Europe. No doubt, there is extensive international literature on planning theory in general from a bewildering variety of viewpoints. The interested professional or student of urban and regional planning is certainly aware of the dizzying flood of books, articles and research reports on planning theory and of their never-ending borrowing of obscure concepts from more respectable scientific disciplines, from mathematics to philosophy and from physics to economics, human geography and sociology. He or she probably observed that there is a growing interest in theoretical approaches from the viewpoint of the so-called "Global South". The author of the present book has for many decades faced the impasse of attempting to transplant theories founded on the experience of

the North-West to countries with a totally different historical, political, social and geographical background. He learned that the reality that planners face is unpredictable, patchy, and responsive to social processes, frequently of a very pedestrian nature. Planning strives to deal with private interests which planners are keen to envelop in a single “public interest”, which is extremely hard to define. The behaviour of the average citizen, far from being that of the neoclassical model of the homo economicus, is that of an individual, a kind of homo individualis, who interacts with the state and the public administration within a complex web of mutual dependence and negotiation. The state and its administrative apparatus, i.e., the key-determinants and fixers of urban and regional planning policy, bargain with this individual, offer inducements, exemptions, derogations and privileges, deviate unhesitatingly from their grand policy pronouncements, but still defend the rationality and comprehensiveness of the planning system they have legislated and operationalized. It is by and large a successful modus vivendi, but only thanks to a constant practice of compromise. Hence, the term compromise planning, which the author coined as an alternative to all the existing theoretical forms of planning. This is the sort of planning, and of the accompanying theory, with which he deals in this book. It is the outcome of experience and knowledge accumulated in a long personal journey of academic teaching in England and Greece, research, and professional involvement.

OECD Economic Surveys: Greece 2011 OECD,2011-08-02 This 2011 edition of OECD's periodic survey of the Greek economy includes chapters covering fiscal sustainability, structural fiscal reforms, and labour and product market reforms.

Sustainable Politics and the Crisis of the Peripheries Liam Leonard,Iosif Botetzagias,2011-11-17 Examines the impact of the economic crisis on peripheral European states such as Ireland and Greece. This book focuses on governance, sustainable politics and environmental policies, within the context of accelerated growth and the subsequent economic downturn. It also examines issues of governance and politics within these peripheral states.

Spatial Planning as Institutional Design Louis C. Wassenhoven,2024-08-06 This book focuses on the urban and regional planning systems under conditions of economic crisis and austerity, focusing in particular on the systems of Cyprus, Greece, Ireland, Italy, Portugal and Spain. Spatial Planning as Institutional Design examines the structure and legislation of these systems throughout the twentieth century as well as the decade before the 2008 economic and fiscal crisis and the years of recovery following it.

National Urban Policy in OECD Countries OECD,2017-05-15 This report, prepared for the United Nations Conference on Housing and Sustainable Urban Development (Habitat III), provides an assessment of the state and scope of NUPs across 35 OECD countries.

OECD Economic Surveys: Greece 2018 OECD,2018-04-30 Greece is on track to recover from a deep depression. Reforms have gathered pace and fiscal consolidation has strengthened credibility, lowering uncertainty. Exports have led the expansion and labour market reforms have improved competitiveness, supporting employment growth,...

Water Resources Management Sustaining Socio-Economic Welfare Phoebe Koundouri, Nikos A.

Papandreou, 2013-11-29 The aim of this book is to offer a river-basin management plan which is directly implementable and consistent with the European Union -Water Framework Directive (EU WFD). The contributors, who are leading world experts in their respective fields, develop an integrated water resources management plan for the Asopos river basin in Greece which is economically efficient, socially equitable and environmentally sustainable. The program offers explicit technical and investment solutions, socioeconomic and legal instruments and recommendations for institutional restructuring. The introductory chapter describes the water situation in Greece and assesses the potential of timely implementation of the EU WFD. Special emphasis is given to the cost-recovery principle. Chapter 2 introduces the case study area highlighting the particular pressures and impacts as well as the environmental functions and values of Asopos River and Oropos Lagoon. Chapters 3 and 4 focus on the economic characterisation of Asopos River Basin in order to identify the economic sectors and social groups that will bear the cost and benefits of the implementation of the EU WFD. In particular, Chapter 3 presents the main water uses and pricing for water supply in the industrial and the agricultural sectors. Chapter 4 completes the baseline appraisal, presenting the details of water use by the residential and touristic sectors. The following chapters assess valuation and decision-making tools from a range of perspectives, including agricultural needs, valuing the impacts of industrial activity, the costs and benefits of environmental preservation and management. The water resources management plan is presented in Chapter 9; the concluding chapter offers recommendations on institutional changes and presents the lessons learned as resources applicable to other river basins in Greece and elsewhere. The book applies state-of-the-art market and non-market valuation methods to estimate water demands in the residential, industrial, agricultural, tourism, environmental and health sectors and to balance these, over time and space, with water supply. Given the well-known challenge of managing natural resources in a way that maximizes and sustains social welfare, this book will provide an invaluable point of reference for applied researchers and policy makers working in water resources management.

Nature Conservation in Europe Graham Tucker, 2023-05-31 A detailed description and analysis of European nature conservation and its achievements, focussing on the EU and last forty years.

Freshwater Fisheries Ecology John F. Craig, 2016-01-12 Inland fisheries are vital for the livelihoods and food resources of humans worldwide but their importance is underestimated, probably because large numbers of small, local operators are involved. Freshwater Fisheries Ecology defines what we have globally, what we are going to lose and mitigate for, and what, given the right tools, we can save. To estimate potential production, the dynamics of freshwater ecosystems (rivers, lakes and estuaries) need to be understood. These dynamics are diverse, as are the earth's freshwater fisheries resources (from boreal to tropical regions), and these influence how fisheries are both utilized and abused. Three main types of fisheries are illustrated within the book: artisanal, commercial and recreational, and the tools which have evolved for fisheries governance and management, including assessment methods, are described. The book also covers in detail fisheries development, providing information on improving fisheries through environmental and habitat evaluation, enhancement and rehabilitation, aquaculture, genetically modified fishes and sustainability. The book thoroughly reviews the negative impacts on fisheries including excessive harvesting, climate change, toxicology, impoundments, barriers and abstractions, non-native species and eutrophication. Finally, key areas of future research are outlined. Freshwater Fisheries Ecology is truly a landmark publication, containing contributions from over 100 leading experts and supported by the Fisheries Society of the British Isles. The global approach makes this book essential reading for fish biologists, fisheries scientists and ecologists and upper level students in these disciplines. Libraries in all universities and research establishments where biological and fisheries sciences are studied and taught should have multiple copies of this hugely valuable resource. About the Editor John Craig is Editor-in-Chief of the Journal of Fish Biology and has an enormous range of expertise and a wealth of knowledge of freshwater fishes and their ecology, having studied them around the globe, including in Asia, North America, Africa, the Middle East and Europe. His particular interests have been in population dynamics and life history strategies. He is a Fellow of the Linnean Society of London and the Royal Society of Biology.

OECD Environmental Performance Reviews: Greece 2020, 2020

OECD Environmental Performance Reviews: Belgium 2021 OECD, 2021-03-31 Belgium has made progress in decoupling several environmental pressures from economic growth, in improving wastewater treatment and in expanding

protected areas. Regions have achieved high levels of recovery and recycling, and have pioneered circular economy policies. However, further efforts are needed to progress towards carbon neutrality, reduce air and water pollution, reverse biodiversity loss and consolidate results of circular economy initiatives.

Greek Banking F. Pasiouras, 2012-06-29 From a period of growth and considerably high levels of profitability, Greek banks recently found themselves battling a major decrease in demand in the local market, and an increase in non-performing loans. How is the Greek banking system able to survive the crisis? This is discussed by looking at the last 15 years of the Greek banking system.

OECD Environmental Performance Reviews, 2000

OECD Environmental Performance Reviews: Greece 2000 OECD, 2000-03-19 This review of Greece's environmental conditions and policies evaluates progress in reducing the pollution burden, improving natural resource management, integrating environmental and economic policies, and strengthening international co-operation.
